

HOW TO DOWNLOAD YOUR PRICE LIST

Original Quality at a Better Price!

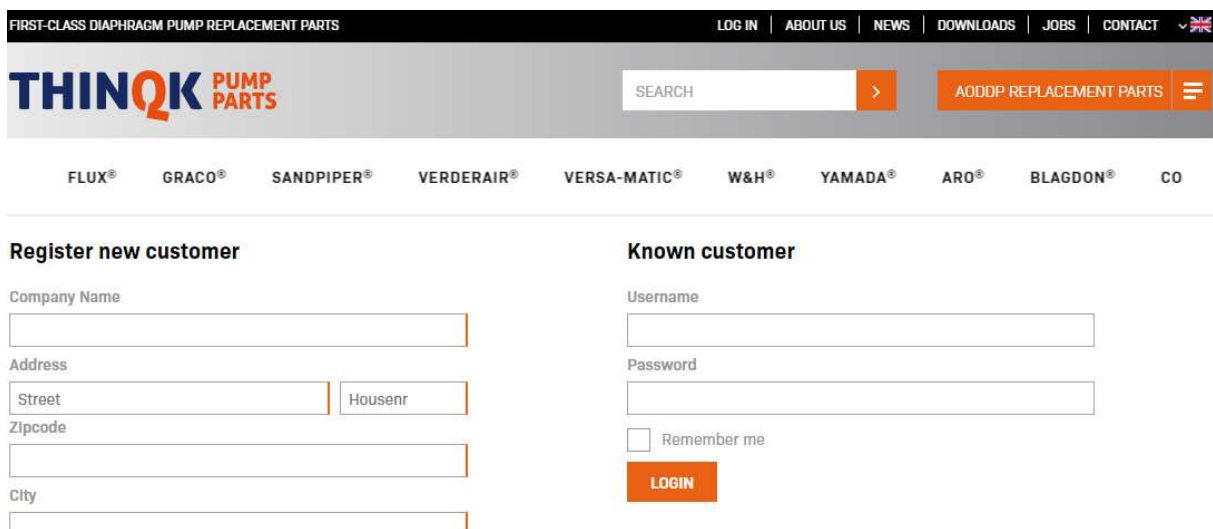

THINQK PUMP
PARTS

HOW TO DOWNLOAD YOUR NET PRICE LIST?

Go to www.shop.thinq.com

Select: "LOG IN" on top of screen.
The next screen will appear.

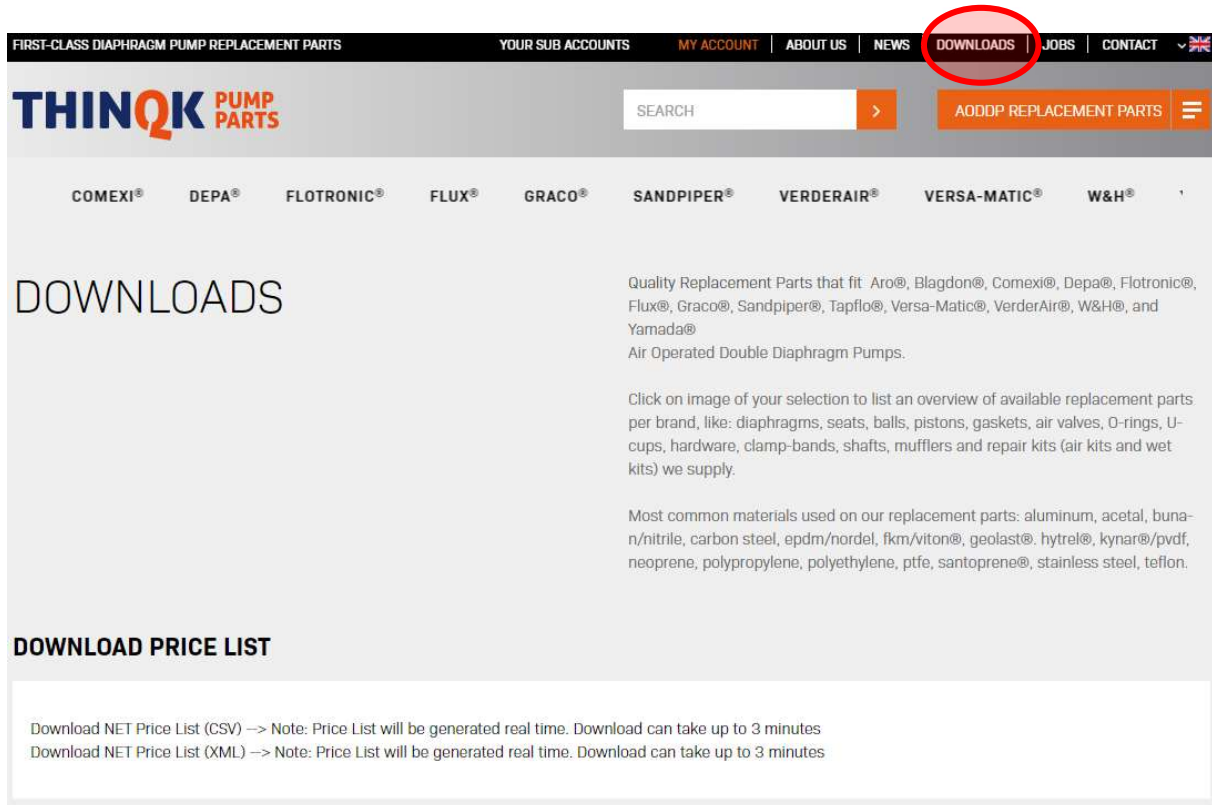

Enter your personal

- Username...
- Password...

Click: LOGIN

Once Logged In select: DOWNLOADS (top of screen).
The following screen will appear

There are two options to download a Price List. Click on option of your preference:

- Option 1: download for opening price list in Excel**
 Click “Download NET Price List (CSV)” to start the download.
 Use this option to download actual NET Price List as a <filename>.csv file which can be imported in excel.
- Option 2: download for implementing price list in ERP system**
 Click “Download NET Price List (XML)” to start the download.
 Use this option to download actual NET Price List as a .XML file which can be imported into your company’s financial software. Implementing XML files is company dependent and will not be explained in this document.
 Please consult your own company’s IT-department/Software consultant for implementing this info into your system.

NOTE: downloaded data for your Net Price list is generated real time, this means that it can take up to three minutes before the file has been downloaded.

The <file name> generated on download will look like: “Producten_1300XXXX_07-03-2023-13-09.csv”

Where:

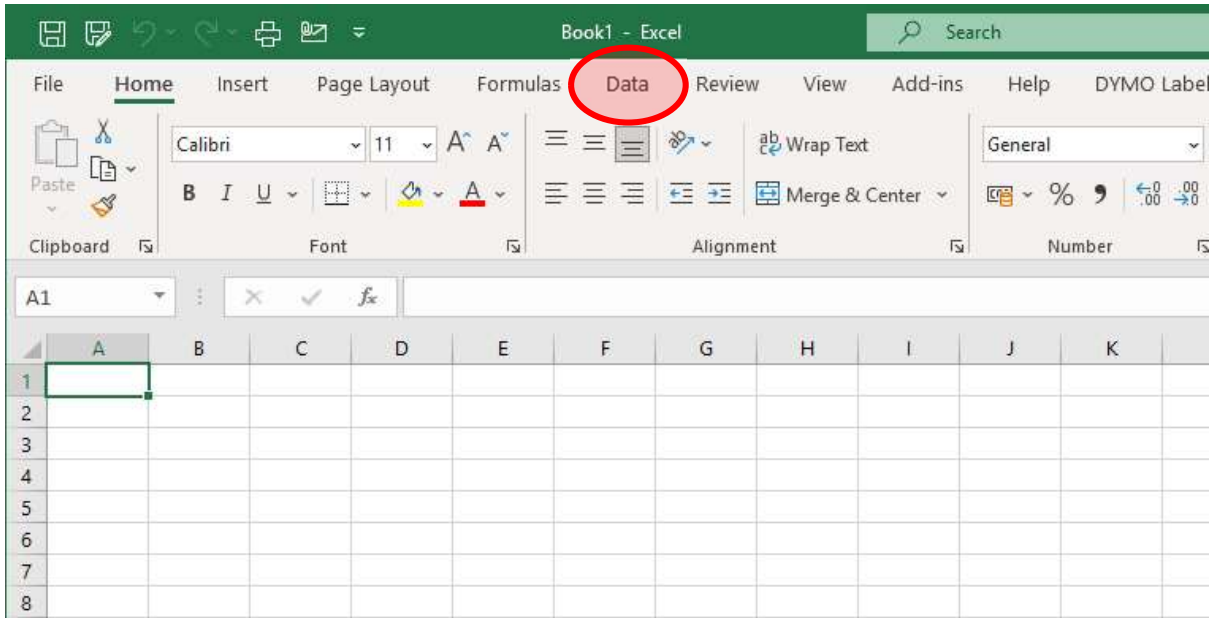

- Producten is the name which is always the same
- 1300XXXX is your customer number in our system
- 07-03-2023 is the date of generated document
- 13-09 is the time of generated document
- .csv is the extension of the document

Continue to the next page to see how the downloaded information can be viewed/stored as Excel file.

OPTION 1: DOWNLOAD FOR OPENING PRICE LIST IN EXCEL

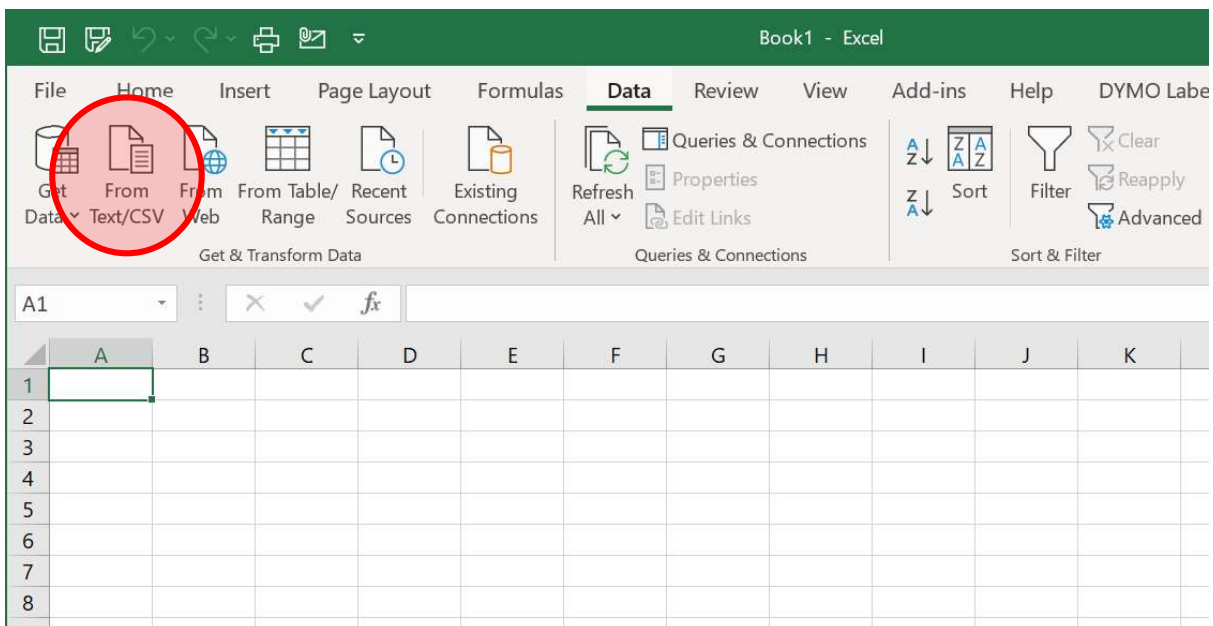

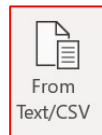

Open Microsoft Excel

- Choose: "New" and click "Blank Workbook"
- Excel will now open a blank workbook (see picture below)

- Go to tab: "Data" and click on it

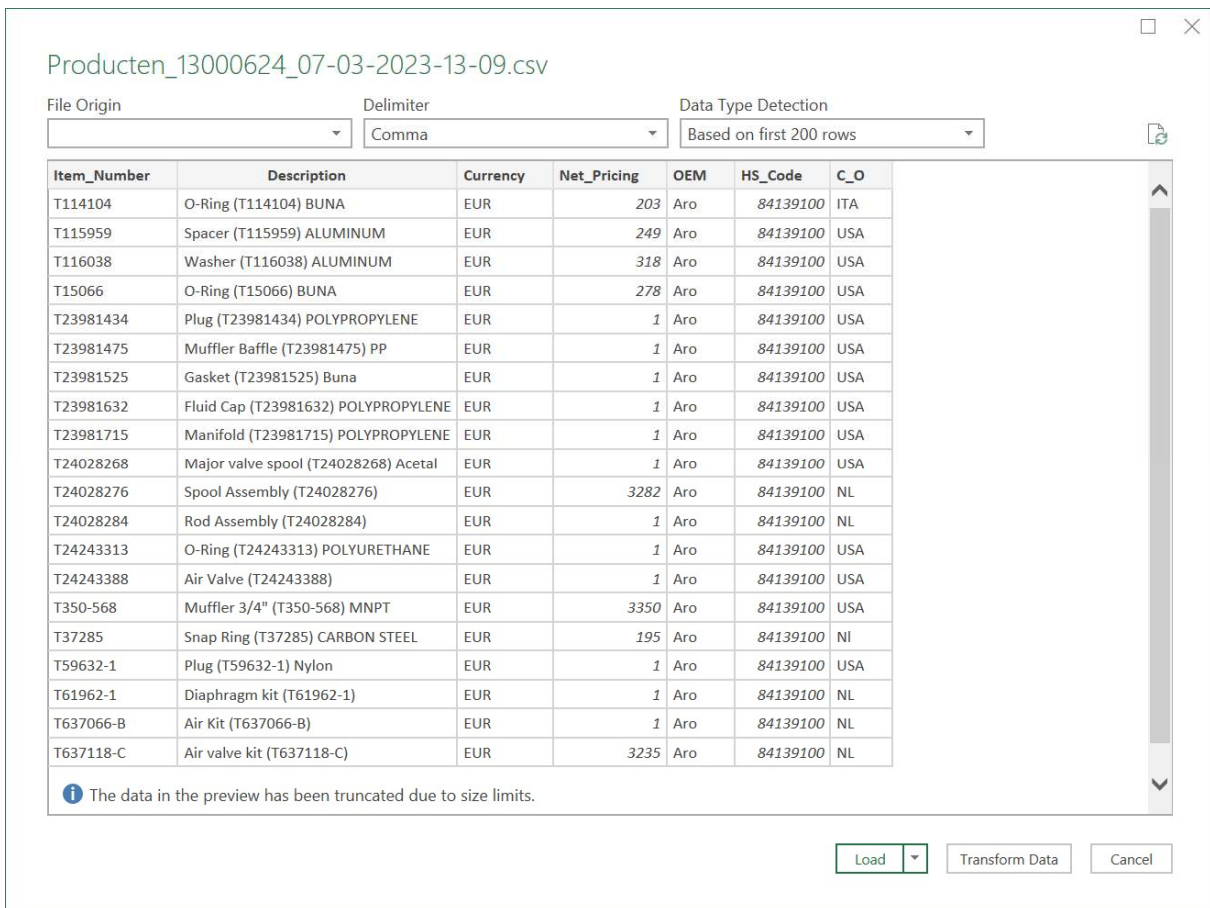

- Click on icon item "From Text/CSV" (see picture below)

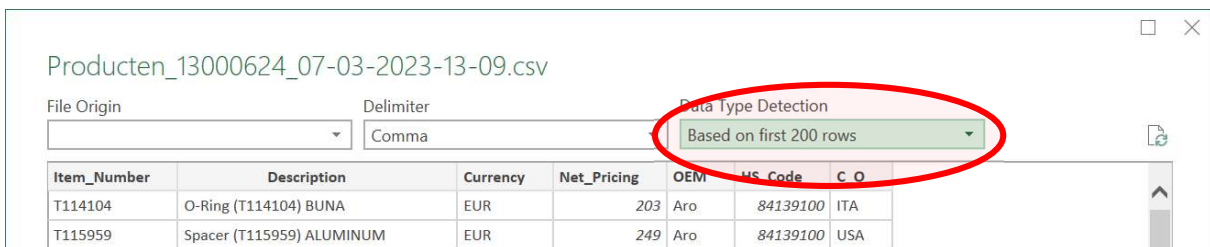

Continue on next page

- Now select the downloaded file.
- Browse on your computer to the location where downloaded documents are saved and select the <file name>.csv file. (Typically this is your Download folder)
(Your downloaded file will have a name according following format: Producten_1300XXXX_07-03-2023-13-09.csv)
- Double Click to open <filename>.csv or select <file name> and click “import in lower right bottom to start opening <file name>.csv in Excel.

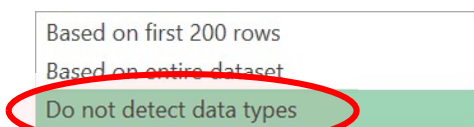

Opening <filename>.csv in EXCEL will shown the following screen:

Go to “Data Type Detection” and click on arrow to open choices

Select option: “Do not detect date types”

Continue on next page

The following overview will be generated

Producten_13000624_07-03-2023-13-09.csv

File Origin: [Dropdown] Delimiter: Comma Data Type Detection: Do not detect data types
